"Somewhere, Something Incredible Is Waiting To Be Known"

PRINCIPAL'S MESSAGE

Francis Castelino
Principal

The world of the 21st century is changing at an accelerated pace. It is a challenge for educators to educate our students in such a way that we equip them for tomorrow. We need to take the curriculum beyond the books to train them in the exercise of life skills so that when our students move into the world, they are mentally, emotionally and socially prepared to take up the challenges in a changing world order. The world is fast changing, and the use of Artificial Intelligence in Education is going to change the scenario in the future.

What is meaningful today becomes obsolete tomorrow. Hence, the educators have a great challenge in preparing our children for the unknown so that they are able to create a place for themselves in the future.

Let us equip ourselves with the required skills and impart it to our children as and when the opportunity arises.

Education is the passport to future,
For tomorrow belongs to those,
Who prepare themselves today. ”
